

# Hey...wait a minute.

## Are you questioning the state-of-the-world right now?

Do you feel that something is wrong with the way our Government is handling COVID?

Do you have that nagging feeling that the numbers don't add up?

Do you "know" social distancing and lockdowns and forced masking is wrong but you don't know what to do about it?

Are you troubled knowing your kids will not have social opportunities at school or church because of social distancing measures and 24-7 mask requirements?

How are you impacted by social isolation? How long do you think it will take your family to recover? Will they ever gain back the ground taken?

What are the spiritual, emotional, and psychological effects of constant mask use? What are we doing to our culture? What will be the long term consequences?

What do you think about the explosion of mental health disorders in America since the lockdown, an issue that was already overwhelming our current system?

2-3 years of wearing masks is almost an entire high school experience. The same time period is almost lightyear-leap for the development of small children. How long will it take our children to recover their social skills? Will they be normal functioning adults?

Are you uncomfortable mandating the COVID vaccine on the entire population?

How many of our elderly have died alone, without family, during the time that we've been "protecting" them from coronavirus? Would you want to spend 2-3 years separated from your loved ones over a fear of illness, only to die alone before the threat disappeared?

If you're waiting for masks and social distancing to eventually go away, how long do you think that will take? Why do you think a virus will disappear?

Are you uncomfortable with the way government has told you who and what was essential, where you could go and under what conditions? Do you feel liberty is hanging by a thread as government and "experts" dictate how we can live our lives based on fear and unproven data?
