

# Sick of COVID-19?

**Are you sick** of extreme measures (business and school shutdowns, mandated masks, government and unelected health-department overreaching of power) over a virus that has proven to **not be** as deadly or contagious as projected?

**Are you sick** of the way "experts" change their minds about everything concerning this virus, altering the data surrounding "cases" and mask effectiveness, and creating **confusion** and unwarranted **fear** and **panic** in the people?

**Are you sick** of being threatened with more lockdowns and mandates that are disrupting and crushing our lives and liberty?

**Are you sick** of the illegal the way government shut down the economy, decided who and what is "essential", and continues to tell you today when, how, what you can and can't do?

## Here's what YOU can do about it today:

The Utah Legislature is holding a "Special Session" SOON on August 20th - which means another round of rapid-fire bill passings, which everyone including the legislators will have barely any time to glance at. It's time RIGHT NOW to put sustained pressure on the entire legislature on two fronts:

- 1) Stopping the Governor's Extension of State-of-Emergency
- 2) Limiting the Health Department's overreach of power during a state-of-emergency.

Otherwise, it's possible that another set of liberty-strangling orders, all based on the so-called "emergency" will sneak through faster than anyone can fight them. We must start protesting NOW to end this problem at the root and start healing our state, communities, and freedoms.

We've prepared a couple letters that can be sent out to the legislators with your changes. The subject: END THE EMERGENCY and CURTAIL HEALTH DEPARTMENT. There should be enough backlash from the public before the session even begins, so they know **we the people** are aware of the way this situation is being continued. If the "emergency" goes away, all the mandates and extreme measures have to go away too. We are NOT in a state of health emergency and should be free from all restraints associated with it.

If you are as SICK OF COVID-19 and the mismanagement of it by Government as we are, it's worth whatever GREAT EFFORT we can give to flood our legislators with our voices about this NOW before August 20th. So much depends on us **taking action now**.

**ACTION TO TAKE:** 1) Go to <https://heyfriendlyouvegotthis.com/take-action-to-defend-freedom/> where you'll find more information, links to legislator contact info, and pdf copies of letters to use and personalize. 2) Send ALL Utah legislators one of the letters. Flood them with emails, texts, and phone calls. 3) Reach out to at least 10 friends and family, giving them the link above, inviting them to also take action for freedom.

For more info please contact us at [unmaskthedata.com](http://unmaskthedata.com) (coming soon, check back if not up yet!) to get involved with local efforts to change the course of our state. We need everyone to help preserve our liberty and family culture.
